ABSTRACT

In a day, there are many visitor that visit to a company. LaVisita Tracking System helps the company management in managing how to helps in keeping the visitor information. The manual ways in recorded the visitor information which is use the paper is not relevant nowadays. Other than the paper is costly, it is also time consuming since the visitor need to fill it out. This system can improve the work efficiency and operations, can increase the security of the company and collect the digital records in better way. LaVisita Tracking System can detect the visitor whereabouts and their information is safe since it is in digital form. The impact of this system is it will help many company in better managing about their visitor and can reduced the staff works. If the manual ways still be used, the staff need to fill the visitor need and it is time consuming. The visitor that used the program provided user friendly interface that help them to use it easily without having any difficulties.
